Operational Guidelines for Tecumseh Power Washers

Effective operation hinges on understanding engine controls, water pressure management, and nozzle selection.

Starting and Stopping the Engine

- Ensure all connections are secure
- Turn on the water supply and verify water flow
- Set the choke (if applicable)
- Turn the ignition switch to "ON"
- Pull the starter cord firmly until the engine starts
- Gradually open the throttle for optimal pressure
- To stop, turn off the engine and relieve pressure by triggering the spray gun

Adjusting Pressure and Spray Pattern

- Use the nozzle tip to control spray intensity: 0°, 15°, 25°, and 40° spray angles
- Attach the appropriate nozzle for the cleaning task
- Adjust the pressure by controlling water flow and nozzle selection
- Maintain a consistent distance from the surface to avoid damage

Using the Power Washer Safely

- Always wear PPE
